Extremely rare !! The only copy we have found described is the one in the catalogue of the Army Medical Library of Washington. Written by an anonymous, French physician in French language. The treatise is written in form of a letter which gives full particulars on a dialogue between Walaeus and another physician on the lacteal vessels and the circulation of the blood. The treatise is not at all directed against Harvey's discoveries (Walaeus was later on one of the adherents of Harvey's discovery), but it contains some most interesting criticism on different points and is therefore of particular interest as a document for and against Harvey's important investigations which apparently has not been published elsewhere. - A few stains but a good and complete copy of this extremely rare booklet.
  
25. D o l a e u s, J. Encyclopaedia chirurgica rationalis. Two vols. 14 leaves, 818 pp., 2 leaves, 508 pp. With curious vignettes on both titles. 4to. Old half vellum. Venice, 1790. \$ 4.75

Genga was one of the first Italians who accepted the theory of the circulation of the blood. - Nice copy.

36. (Medical Doctor's Degree). G e n t i l i, Ignatius Franciscus, from Raven-  
na, physician. The Medical Doctor's Degree of I. Fr. Gentili, six  
pages beautifully written on vellum, in its nice original binding  
of full calf. With very nice miniature of full page size, finely  
painted showing two soldiers, beautiful large initials letters  
painted in different colours. The entire degree beautifully written  
in a remarkable calligraphy, great part in large gilt letters. As  
we learn from the degree, it has been made under the direction of  
G.G. Sbaraglia (the famous antagonist of Malpighi), I.J. Aldrovandi  
and others. - 4to. Bologna, 1698. \$ 9.75

Documents of this kind are rarely to be found, especially with fine  
decorations as the one here offered.
